Canteen usage

Torre Parc Joan Miró · 20 August to 2 October 2026 · 30 working days · 180 seats

CANTEEN · FOOTFALL AND PEAKS

The Canteen only gets close to full on Tuesdays at lunchtime: 165 people on 15/9, 92% of its seats. An average day peaks at 76.

On **23 of the 30 working days** the peak hour is 14:00 to 15:00. On Tuesdays the average peak is **123 people**; on Fridays, **23**. On days with 150 or more people in the building, the Canteen holds **50 out of every 100** of them at its peak.

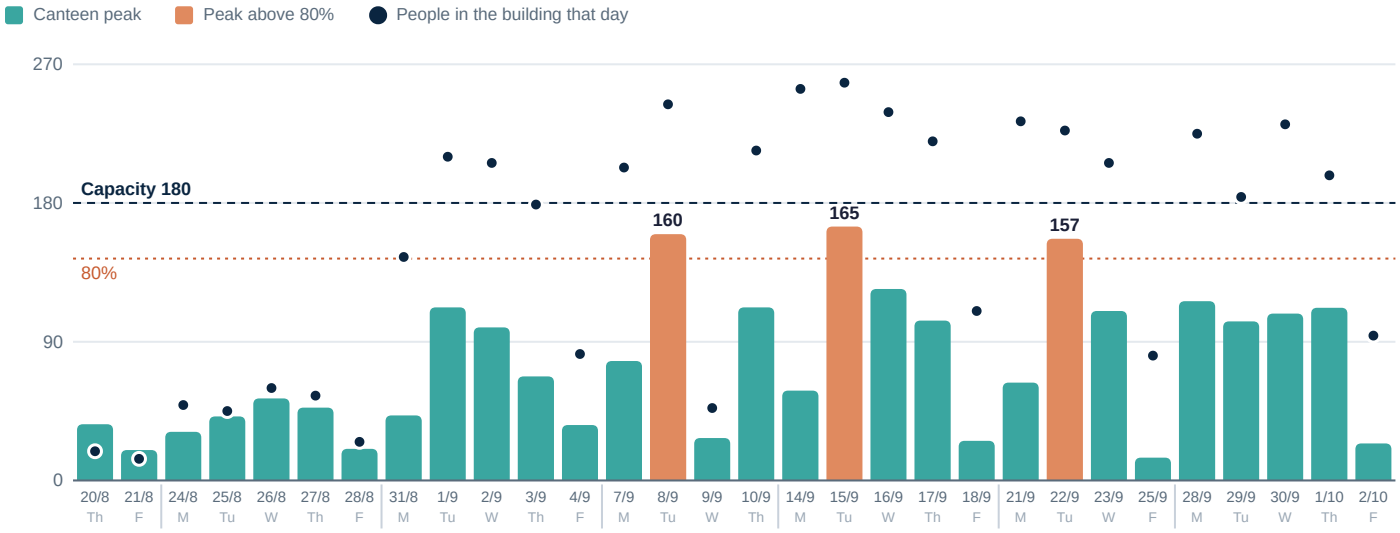

165 / 180
Highest peak, Tuesday 15/9, 14:00 to 15:00 (92%)

76
Average daily peak (42% of seats). Since 31/8: 88

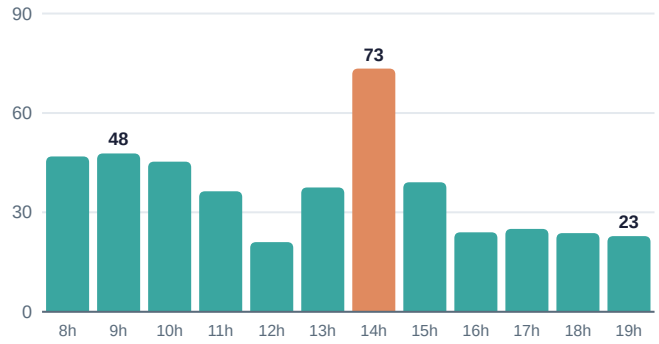

3 of 30
Days above 80% (144 people). All three on Tuesdays: 8/9, 15/9, 22/9

14-15 h
Peak hour on 23 of 30 days. Average at that hour: 73 people

DAILY PEAK · people at the same time in the busiest hour of the day, against people who came to the building

AVERAGE DAY, HOUR BY HOUR · people at the same time

Average of the 30 working days. At 19:00 the count still shows 23 people on average: see footer.

BY DAY OF THE WEEK

Day	Days	Average peak	% seats	People in the building
Monday	6	**65**	36%	185
Tuesday	6	**123**	68%	195
Wednesday	6	**87**	48%	165
Thursday	6	**80**	44%	148
Friday	6	**23**	13%	68

Tuesday is the only day above half the seats on average. On Fridays the Canteen is barely used.

October, left out of the analysis. From 5 to 14/10 the peak jumps to 11:00 and the Canteen reads almost zero in the afternoon, while the building is at its normal attendance (about 200 people). From 15/10 afternoon occupancy rises and stays flat until 19:00: Friday 16/10 shows 98 people with 90 in the whole building, which is not possible. On 9/10 it shows a flat 40 people all day. The sensor should be checked before these data are used.

Source: iKnos, site 11012, Canteen zone (dining type, attached to the building rather than to a floor), queried on 27/10/2026 with *getCanteensData*; capacity of 180 from *getZonesAndRoomsCapacities*; people in the building with *getLocalDailyHeadcount* (dashboard default tag). **Window:** 6 months were requested (27/4 to 26/10/2026), but the Canteen has no data before 20/8. 30 working days from 20/8 to 2/10 are used; 24/9 is excluded (La Mercè holiday, Canteen at zero) and there are no data for 11/9 or 12/10 (public holidays). Times in Madrid time. **Limitations:** each value is the average occupancy of the hour; the platform returns the same figure as the maximum, so the real peak within the hour may be somewhat higher. The Canteen never drops to zero at closing (23 people on average at 19:00), which points to a mismatch between entries and exits: figures may be slightly inflated. August, with few people, lowers the averages. No visit duration data. "Held at its peak" compares people at the same time with distinct people in the day. Internal use.
